### WALL STREET.

THURSDAY, Nov. 9. Tight money is again plaguing the that que stock market. The high rates for call follows:

Tight money is again playing the stock market. The high rates for call loans—ranging from 8 to 14 per cent.—have upset the plans of many buil operators, besides scaring away most of the small speculators. Nobody wants to carry marginal stocks over night because of the uncertainty of the monetary situation. The first call loan reported to-day was at 8 1-2 per cent.

During the forenoon, loans and renewals were made at 8 per cent, and fears of a money stringency began creeping through the street. Suddenly the rate jumped to 12 per cent, and thence quickly to 14 per cent.

Some one undertook to relieve the stock market depression by circulating a rumor that the Secretary of the Treasury was considering the advisability of depositing about \$20,000,000 of additional government money in the New York banks. This rumor was discredited by bank presidents generally. A member of the Clearing House committee expressed the opinion that no such action on the par of Secretary Shaw was mecessery. The United States Government money as a measure of last reon the part of Secretary Shaw was brighted States Government should not meddle with the money market except as a measure of last respect to avent a crisis," said this banker, siddings "And there is no crisis in sight.

Money may continue firm for some time Metro. St. R.R. middings "And there is no orisis in sight.

With the sensational rise in the rate for call-money the banks began calling some of their loans and insisting on renewals at the higher rates. In many higher rates and sold the stocks that

they were carrying.

Heavy selling of the local traction continued to-day and a large number of important speculative acdon, quite naturally, was accelerated by the flare-up in money rates. There were exciting reports from time to time that the banks were calling loans indisoriminately. In connection with the weakness of the local traction stocks nd Consolidated Gas, much significant selk is heard about future franchise prospects. The political speculative contingent has about reached the conlusion that Tammany will be in no solition to grant any public favors for bellef unt Mayor McClellan and the new board of estimate will interpret the vote of last Tuesday as an admonition that the people's interests must in no way be trifled with. Tammany there-

fore cannot be expected to bestow any subway franchises on favorites, Polititraction stocks on the assurance of a rise in price in the event of a Tammany Victory are now very much disgruntled. elements of strength were not lacking in the market was evidenced by the determined backing given to lters, Reading. Pennsylvania. New York Centrol and Erie. There was considerable quiet buying of New York ntral on the expectation of an in-This road reports for October an orease in gross carnings of \$961.557, and an increase in gross for the ten months ended Oot. 31, of a little more than \$6,-000,000. It is estimated that an increase of \$7,500,000 will be shown when the whole year's earnings are published.

Missouri Pacific has sumpled a little

emore than 5 points within the past few days. There has been no particular attack on this stock, its weakness hav-ing developed mostly from inside sell-ing. Rumore abound that the present dividend rate of 5 per cent, is to be re-duced. This rathern surface has duced. This railway system has earned and paid 5 per cent. per annum since the middle of 1901. From July 1 to Oot. Il of the present year Missouri Pacific has lost \$50 to gross earnings as compared with fast year. Nevertheless the officials of the company expect that the total net earnings for 1905 will amount to \$15,00,000. It will require only \$11,700,000 to pay the 5 per cent. dividend. Neither President George J. Gould nor any of the Missouri Pacific directors will discuss the possibility a reduction in the dividend rate.

possibilly a reduction in the dividend rate.

There has been a noticeable lapse of
speculative interest in Canadian Pacific
the past two days. The leading bull
operators in this stock are believed to
be surveying the field preparatory to
another forward movement. There is
no pool stock offered on the market
and the Canadian Pacific specialists in
the Stock Exchange are still advising
their friends to buy for a rise. President O'Shaughnessy, of the Canadian
Pacific system, to-day denied the report
that outside interests and bought control of this road. He says that there
is no danger whatever of any change
of control.
